

Dear Hiring Manager,

I am excited to apply for the senior technical management roles at your company. With over a decade of experience in engineering leadership, full-stack development, and cutting-edge technologies, I bring a proven track record of driving innovation, managing cross-functional teams, and delivering scalable solutions. My expertise spans across AI, blockchain, cloud computing, and DevOps, making me well-equipped to contribute to company's mission and technical goals.

In my current role as an Engineering Manager at IVY IT, I lead a team of 17-20 developers in building Adventr, an interactive streaming tool that delivers smart videos through CRM and CMS integrations. I also spearhead the development of domain-specific LLaMA RAG applications, leveraging serverless CI/CD pipelines to ensure seamless deployment. My ability to align technical execution with business objectives has consistently resulted in impactful product evolution.

Previously, at INDORAMA, I successfully rolled out SAP S4/HANA modules (FI, MM, and PP) at JSC «Farg'onaazot» in collaboration with EY, while overseeing Farmgrow, an app connecting farmers across Eurasia to key agricultural resources. My experience in managing IT operations and delivering enterprise-level solutions has honed my skills in strategic planning and execution.

At FEMZRD, I managed teams of 20-30 programmers to build and deploy decentralized finance (DeFi) protocols like Uniswap, as well as Web3 applications with smart contract integrations. My work in blockchain and decentralized systems has given me a deep understanding of emerging technologies and their potential to transform industries.

I am particularly drawn to your brand because of its reputation for innovation, cutting-edge technology, and impactful projects. I am confident that my technical expertise, leadership experience, and passion for solving complex problems align well with your team's goals.

I would welcome the opportunity to discuss how my skills and experiences can contribute to organization success. Thank you for considering my application. I look forward to the possibility of working together.

Sincerely,

Prateek Rastogi
